## Plant Total RNA Isolation Kit

**Complete the test within 30 minutes**

The kit uses the spin column and formula developed by Foregene, which can efficiently extract high-purity and high-quality total RNA from various plant tissues with low polysaccharides and polyphenols content. For plant samples with high polysaccharides or polyphenols content, it is recommended to use Plant Total RNA Isolation Plus Kit to get better RNA extraction results. The kit provides the DNA-Cleaning column that can easily remove genomic DNA from the supernatant and tissue lysate. RNA-only column can effectively bind RNA. The kit can process a large number of samples at the same time. The entire system does not contain RNase, so the purified RNA will not be degraded. Buffer PRW1 and Buffer PRW2 can ensure that the RNA obtained is not contaminated by protein, DNA, ions, and organic compounds.

## Plant Total RNA Isolation Kit

50 Tests/200 Tests Box

### Product components

- ◆ Buffer PRL1, Buffer PRL2
- ◆ Buffer PRW1, Buffer PRW2
- ◆ RNase-Free ddH<sub>2</sub>O, DNA-Cleaning Column
- ◆ RNA-Only Column
- ◆ Instructions

### Ordering information

Product Name	Ref No.	Specifications	Description
Plant Total RNA Isolation Kit	RE-05011	50Preps	Quickly purify high-quality total RNA from a variety of plant samples with low polysaccharide polyphenol content.
Plant Total RNA Isolation Kit	RE-05014	200Preps

# PRODUCT INTRODUCTION

# FOREGENE

## Features&advantages

- △ Particularly suitable for the purification of RNA from plant samples with low polysaccharides and polyphenols content.
- △ No need to worry about RNA degradation. The whole system is RNase-Free
- △ Effectively remove DNA using DNA-Cleaning Column
- △ Remove DNA without adding Dnase
- △ Simple—all operations are completed at room temperature
- △ Fast—operation can be completed in 30 minutes
- △ Safe—no organic reagent used
- △ High quality—the purified RNA is highly pure, free of protein and other impurities, and can meet various downstream experimental applications.

## Operation process

## experimental result

Plant Total RNA Isolation Kit Plus

Treated plant fresh leaves with polysaccharide polyphenols

50mg, Take 5% purified RNA for electrophoresis.

1:banana 2:ginkgo 3:cotton 4:pomegranate

## Advantages of foregene RNA isolation Kit

Tradtional TRIzol Method		Foregene Isolation Kits Method	
01	✗ Use toxic reagents such as Phenol and Chloroform	→	No toxic reagents added ✓ 01
02	✗ Complex operation and long extraction time	→	Simple operation, the whole process only need 11 mins ✓ 02
03	✗ Remove DNA contamination with DNase	→	No enzymes are added, use DNA cleaning column ✓ 03

## Preservation conditions

The kit can be stored for 12 months at room temperature (15–25 °C) or 2–8 °C for longer time(24 months).

Buffer cRL1 can be stored at 4 °C for 1 month after adding 2-hydroxy-1-ethanethiol(optional).

## Product application

*\*Plant Total RNA Isolation Kit:*

*It is suitable for the extraction and purification of total RNA from fresh or frozen plant.*

# COMPANY PROFILE

# FOREGENE

Foregene is specialized in the IVD kits and the lab reagents products ,which is integrated in R&D, manufacturing and marketing together. Foregene has the world's leading Direct PCR platform. The main products include various IVD kits, nucleic acid purification reagents, PCR and Direct PCR reagents, Genotyping kits, etc. The technology and product performance indicators used are all leading the world status, widely applied in hospitals, institutions, medical laboratories, etc.
